INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International aplication No. PCT/KR2004/001891

Box No	o. I Basis of the report	
1. Wi	With regard to the language, this report is based on the international application in the language therwise indicated under this item. This report is based on translations from the original language into the following langua which is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)	
l to th	th regard to the elements of the international application, this report is based on (replacement the receiving Office in response to an invitation under Article 14 are referred to in this reort of the nexed to this report): The international application as originally filed/furnished	t sheets which have been furnished ns "originally filed" and are not
	the description: pages pages* pages* received by this Authority on pages* received by this Authority on	as originally filed/furnished
	pages* as amended (together with	as originally filed/furnished any statment) under Article 19
	the drawings: pages pages*	as originally filed/furnished
3.	the sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence The amendments have resulted in the cancellation of: the description, pages the claims, Nos. the drawings, sheets the sequence listing (specify): any table(s) related to sequence listing (specify):	ce Listing.
4	This report has been established as if (some of) the amendments annexed to this report and made, since they have been considered to go beyond the disclosure as filed, as indicated in (Rule 70.2(c)). the description, pages the claims, Nos. the drawings, sheets the sequence listing (specify): any table(s) related to sequence listing (specify):	the Supplemental Box
* If item	n 4 applies, some or all of those sheets may be marked "superseded."	

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International aplication No.

PCT/KR2004/001891

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1-6	YES -
		Claims		NO
	Inventive step (IS)	Claims	1-6	YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-6	YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

Claims 1-6 of this invention relate to a formulation of albumin-freee EPO comprising hydroxyethyl starch or hydroxyethyl starch and amino acids

The following document have been considered for the purpose of this report:

D1= US 6,586,573 B1, Jul. 1, 2003

D2= Cryobiology, 2002, Vol. 45, No. 2, pp. 153-166.

1. Novelty

Claims 1-6 of this invention relate to a formulation of albumin-freee EPO comprising hydroxyethyl starch or hydroxyethyl starch and amino acids.

Document D1, which has been published prior to the filing date of the present application, discloses a formulation of albumin-freee Factor VIII comprising hydroxyethyl starch or hydroxyethyl starch and amino acids, which is different from those of this invention in terms of protein of interest for formulation. Therefore, the subject matter of claim 1-6 is considered to be novel [PCT Article 33(2)]

2. Inventive Step

The object of this invention and D1 have the same object of not containing albumin as a stabilizing agent for protein formulation. Also, the technical composition of this invention is similar to those of D1 such as protein of interest, amino acids and 0.1-10% hydroxyethyl starch compared to 2-6% in D1. But D1 utilized hydroxyethyl starch as a bulking agent, whereas this invention utilized it as a stabilizing agent. It has been known in the prior art that hydroxyethyl starch has stabilizing effect for freezing the protein without loosing the activity, as described in D2. Thus it is not surprising selecting hydroxyethyl starch as stabilizer for EPO. But it have to be noted that the stabilizer and the resulting effect could be varied among the proteins according to physical and biochemical properties of proteins to be formulated. Thus, the effort to select stabilizer and to determine the stabilizing effect of hydroxyethyl starch should be appreciated as a surprising technical effect.

Therefore the subject matter of claims 1-6 is considered to involve an inventive step within the meaning of Article 33(3) PCT.

3. Industrial applicability

The subject matter of claims 1-6 is considered to be industrially applicable. [PCT Article 33(4)]
